PROFESSIONAL SUMMARY

Software Engineer with 1+ year of experience building high-performance applications in C++, Python, and JavaScript. Designed and deployed production-grade AI systems including multimodal RAG pipelines and agentic workflows on Azure Kubernetes Service (AKS). Proficient in Docker, Kubernetes, Continuous Integration/Continuous Deployment (CI/CD), and cloud infrastructure. AWS Cloud Practitioner essentials certified with strong cross-functional collaboration skills.

EDUCATION

Pune Institute of Computer Technology

B.E. in Computer Engineering | CGPA: 8.73/10

2021 – 2025

Pune, Maharashtra

WORK EXPERIENCE

Quorum Software — *Software Engineer*

Pune, Maharashtra

June 2025 – Present

- Developed features and optimized performance in C++ for FLOWCAL, a mission-critical measurement software serving 500+ enterprise clients in the Oil and Gas industry.
- Automated deployment workflows by building release pipelines in Azure DevOps, reducing manual provisioning time by 80%.
- Built an Agentic Workflow plugin for end-to-end test case automation using AI agents, skills, and Model Context Protocol (MCP) configurations.

Nasdaq — *Tech Intern*

Pune, Maharashtra

January 2025 – June 2025

- Implemented automated test suites using Java, increasing test coverage by 35% and reducing manual testing effort across financial trading systems.

PROJECTS

SPECTRA — Multimodal Agentic Document Intelligence Platform | [GitHub](#)

- Architected a production-grade multimodal RAG system for natural language Q&A over large-scale technical documentation with image retrieval, reducing search time by 90%.
- Engineered an agentic pipeline using LangGraph with 4 agents (Router, Research, Grader, Synthesis) featuring query decomposition, self-correction loops, and citation-backed answers.
- Implemented hybrid search (dense embeddings + BM25 + RRF) with cross-encoder reranking; designed Redis-backed conversational memory with rolling LLM summaries.
- Deployed on AKS with zero-secret architecture (Key Vault + Workload Identity), JWT auth, NetworkPolicy, and HPA auto-scaling.
- Technologies:** Python, FastAPI, LangChain, LangGraph, Qdrant, Redis, Azure OpenAI (GPT-4.1), Docker, Kubernetes, AKS

RESCUENEX — Disaster Response Locator | Smart India Hackathon 2023 | [GitHub](#)

- Led a team of 5 to build an interactive web app for visualizing rescue agency locations during disasters across India, serving 50+ agency data points.
- Implemented real-time chat using Socket.IO and integrated dynamic map with disaster-type filters using Leaflet and Highcharts.
- Technologies:** Socket.IO, Highcharts, Leaflet, Three.js, Node.js, Express, MongoDB

SECUREPULSE — Dynamic DevSecOps Pipeline Integration | [GitHub](#)

- Executed end-to-end CI/CD pipeline with GitOps workflow, reducing deployment time by 70%; integrated SonarQube, Trivy, and OWASP for security scanning.
- Enhanced code quality by 40% and reduced vulnerabilities by 60%; implemented monitoring with Prometheus and Grafana on AKS.
- Technologies:** Docker, Jenkins, ArgoCD, SonarQube, Trivy, OWASP, Prometheus, Grafana, Kubernetes, AKS

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, SQL

AI & Machine Learning: Agentic AI, RAG Pipelines, LangChain, LangGraph, Qdrant, MCP Servers

Web & Databases: Node.js, Express.js, React.js, FastAPI, MySQL, MongoDB, Redis

Cloud & DevOps: Azure, AWS, Docker, Kubernetes, CI/CD Pipelines

Developer Tools: Claude Code, GitHub Copilot, Linux, VS Code

CERTIFICATIONS & ACHIEVEMENTS

- Solved 600+ DSA problems on [LeetCode](#), demonstrating strong problem-solving and analytical skills
- AWS Cloud Practitioner Certified with [AWS Educate Badges](#) (2024)
- Qualified Smart India Hackathon 2023 Internal Hackathon at PICT, among 300 teams
